Summary

Data analyst and backend oriented developer with 2 years of experience building reliable data pipelines, reports, and integrations using SQL, PL/SQL, Python, REST APIs, and Tableau. Skilled at validating and reconciling large datasets, writing optimized queries, developing backend logic, and delivering dashboards and automations that turn data into decision ready insights.

Technical Skills

- **Languages:** SQL, PL/SQL, Python, JavaScript,Golong
- **Analytics & BI:** Tableau, Microsoft Excel, SAS (Basic)
- **Databases & Tools:** Oracle Database, Oracle SQL Developer, REST APIs, Kore.AI, Docker, Git/GitHub
- **Core Strengths:** Data Validation, Data Reconciliation, Query Optimization, API Integration, Reporting & Visualization

Experience

Quadface Technologies Remote

Software Consultant Trainee *June 2024 – Present*

- Supported daily and monthly production allocation in **Energy Components (EC)**, working with upstream production data to keep production reporting accurate.
- Validated and reconciled well-level production data across allocation cycles, identifying and resolving discrepancies to maintain data consistency and reliability.
- Wrote and optimized **SQL** queries to extract, validate, and analyze large production datasets for reporting and decision-making.
- Built **Tableau** dashboards to monitor production trends and support operational analysis.
- Prepared and validated recurring operational reports, ensuring data was accurate before delivery to stakeholders.

Projects

Healthcare Customer Service Automation | *Kore.ai XO 11, REST APIs, JavaScript* | GitHub

- Built a virtual assistant for appointment management and insurance eligibility, driven by live REST API responses.
- Created mock JSON endpoints and JavaScript script nodes that match exact IDs and map backend data to ten status scenarios.
- Added human-agent transfer that passes only non-sensitive context; tested positive, negative, exception, and transfer cases.

DDoS Attack Detection using Machine Learning | *Python, pandas, scikit-learn* | GitHub

- Built an AdaBoost classifier to detect DDoS attacks from network traffic data.
- Handled data preprocessing, feature engineering, and model training; evaluated with accuracy, precision, and confusion matrix to reduce false positives.

Smart Budget Tracker | *Oracle PL/SQL* | GitHub

- Developed a PL/SQL budgeting system covering expense tracking, debt management, and financial reporting.
- Designed the database schema and stored procedures; generated monthly summaries and category-wise insights using SQL aggregates.

Education

KLE Technological University Hubballi, India

Master of Computer Applications (MCA); ***CGPA: 8.54*** *Feb 2022 – Jan 2024*

Achievements

- Earned **Gold Badge** on HackerRank (SQL / Python)
- Participated in EY Scholarship Program – *A Brand Called YOU*
- Featured on the official company website for contributions at Quadface Technologies
